Subject: FW: AOGCC Cook Inlet injection data

Tim,

In the folder G:\Cook Inlet General Permit, there is a file called Produced Water + Cu that has info in it from 2008 until February or March of 2014.

Hope it helps.

Cindi

Subject: FW: AOGCC Cook Inlet injection data

Hi Tim,

Would you have time to assemble the information from DMRs from the three production platforms in Cook Inlet (Granite Point, Trading Bay and East Forelands)? Please give me a call to discuss.

Thanks,

Hanh

Subject: RE: AOGCC Cook Inlet injection data

Hanh,

We have received a follow up request from John Veil who is working on a survey of States produced water disposal management practices in conjunction with the Ground Water Protection Council. I provided Alaska data from 2012 AOGCC sources and he pointed out that I may not have included NPDES discharges which is correct. He provided a quote from his previous survey of 2007 data:

“Management information for discharges from production activities in the Cook Inlet was obtained from U.S. EPA Region 10. In 2007, 35,479,866 bbl of produced water were directly discharged into the Cook Inlet”.

Can you provide me with Cook Inlet platform offshore NPDES discharge data for years 2007 to most recent? I would like to compare it with our produced water numbers. We are always assuming (and being told by Operators) that NPDES volumes were small in respect to underground disposal and especially small as a percentage of overall Alaska Oil and Gas discharges (approx. 1-3%).

Thanks and Regards,

Chris Wallace

Subject: AOGCC Cook Inlet injection data

Hanh,

Thank you for opportunity to participate in the conference call this morning.

As discussed, please find data on the injection volumes provided to AOGCC on the Cook Inlet wells. Note the wells are classified as Class I disposal, Class II disposal, and Class II enhanced oil recovery (EOR). We have grouped the wells by platform then pool, but have provided the raw data as well.

If you have additional questions or think of additional data that we may have that can assist you, please let me know.

Thanks and Regards,

Chris Wallace
